Glem World

PROJECT *and* EMOTION MADE *in* ITALY

Glem brand belongs to Glem Gas group established in 1959 in San Cesario, a few kilometers from Modena, in the heart of Emilia and of this territory it proudly carries on the culinary excellence, the artistic tradition, the passion for the land, the spirit of innovation and the craftsmanship of its people. The technological and aesthetic content of our products represents our absolute value, a rigorous and

emblematic image of Made in Italy. Materials, shapes and technologies of Glem products are developed thanks to our research and development department through the collaboration with designers of international renown. All our products are assembled in our local premises and are submitted to strict quality controls so as to grant excellent performances both technological and aesthetic.

Glem Experience

IO CUCINO *con* GLEM

Glem represents the Italian excellence in realizing cooking appliances at an international level. Our product range, wide and varied, follows and brings forward the market development so as to grant the highest quality worldwide. Made in Italy is for us a synonym of style, design and product quality, attention for the environment and for the people. Passion is the essential in-

gredient for every successful recipes. Glem has changed how to conceive the kitchen through a new aesthetic function of the appliances. It is a creative room where design and functionality allow to express the own taste and style thanks to the versatility of a range, aesthetically refined and simple to use, in position to satisfy any tastes and needs.

Io Cucino
con
 **GLEM**

MADE IN ITALY

Glem Style

GLOBAL *and* SMART CITIZENS

We develop products according to the contemporary living, favouring materials and innovative shapes which grant charming aesthetic, ergonomic shapes, ease of use and maintenance. Our appliances become object of

furniture able to perfectly adapt to the last fashion trends and interior design. Pragmatism, experience and creativity are the ingredients which have brought Glem to receive prestigious awards and praises in the design area.

TITANIUM ENAMEL - EASY TO CLEAN

Thanks to the low porosity of the titanium enamel, cleaning is so much easier and reduces dirt build up. The titanium enamel is resistant to the attack of acids and maintains its colour over time even after intensive use.

SAFE TOUCH

Thanks to an innovative induced tangential cooling system which exhausts hot air from the rear of the cook top, supplied on the Matrix and Unica models, the operational surface temperatures are reduced.

COLD DOOR

The Monolith model is supplied with a triple-glass that, together with the tangential-flow cooling fan, guarantees lower temperatures on the oven door.

REMOVABLE FULL GLASS DOOR

The glass window is easily removable to allow the cleaning of the internal glass.

TANGENTIAL COOLING FAN

The tangential cooling fan: the hot air is expelled reducing the temperature of the external surface.

MULTIFUNCTION GAS OVEN WITH FAN

Glem has created an innovative oven which combines all the features of a multifunction electric oven with those of a gas oven. The traditional cooking of a gas oven, ideal for roasting and baking, combined with fan forced ventilation provides a great heat distribution for single and multi-level cooking. More recipes prepared in less time and with less energy consumption.

MULTICHEF (FAN SWITCH)

The Multichef button allows you to select between fan assisted or static cooking in gas ovens. This provides great versatility in cooking times and methods. The accurate and constant temperature of the oven browns dishes perfectly and allows you to cook more than one dish simultaneously, optimising the use of the space inside the oven.

SAFETY VALVE

Thermocouple stops the flow of gas in the event of an accidental flame failure. The thermocouple intervenes within 3 seconds of the flame switching off and it is active even in the event of a power cut.

TRIPLE RING BURNER

The special burner with triple ring makes the most of the power and the special form of the burner permits uniformity of the flame. The power of 3.3 kW to 3.8 kW ensures maximum efficiency and faster cooking times.

ENERGY EFFICIENCY CLASS

DUAL BURNER WITH DUAL CONTROL

The dual control means you can adjust the flame for each individual ring at a power of between 0.8 kW and 4.5 kW. It is therefore possible to turn on the central ring or the dual outer ring, or both: for large and small pans, concentrating the heat and energy only where it is needed.

LEFT TRIPLE RING BURNER

This is a new layout. We have positioned the triple ring burner (3,6 kW) on the left. The overall functionality of the cook top is perfectly optimised. Even when using a 30 cm diameter pan on the left burner, there is enough clearance for other pans to be used on the other burners.

FRYTOP

Frytop metal plate is ideal for frying and bake according to Japanese tradition. The cooking zone of 1.950 W, allows you to prepare or keep food warm both on the middle or on the entire cooking surface. It also has a perfect temperature control as well as an optimal heat distribution for preparing delicate food, low-fat meat, fish and vegetables.

CRYSTAL LID

Glass crystal lid ensures the protection of the kitchen wall rear the cook top from stains and dirt produced during cooking. In addition it allows you to preserve the cleanliness of your household appliance.

BUILT-IN

All Glem cookers are approved to be built into your kitchen cabinets according to the European Built-in Homologation (UNI EN 30-1-1 class 2). No space required between the bench and the cooker.

MAXI GRILL

Thanks to new gas burner the grilling area increased to 75%.

DEFROSTING

Defrost by fan alone reduce by 30% defrost timing of your frozen food.

SIDES COLUMNS

Our premium cookers were designed with side columns to underline the solidity of the materials and the strength of these new range ones.
