BI-ENERGY COOKER WITH ENERGY SELECTIVE OVEN

Gas for recipes that require moist heat

IT965GGEI2

Benefits of gas cooking:

- Moist heat for roasting
- Excellent temperature control
- Fast heat up
- Low operating costs
- Lower greenhouse emissions

Energy Selective Oven - select your

The Glem Bi-Energy Cooker features an Energy Selective Oven, providing the option of cooking with gas or electricity in the one oven. Simply choose the right energy source for

MAKES COOKING YOUR FAVOURITE DISHES EASIER

Electricity for recipes that require dry heat

recipe, select your energy source.

the recipe - the moist heat of gas for succulent roasted meats and the dry heat of electricity for perfectly crusty bread and crisp pastries.

Benefits of electric oven cooking:

- Dry heat for baking
- Multifunction flexibility – the heat can be applied in different zones
- Some recipes specifically provide electric oven operating instructions.

A space for every pot

The Glem Bi-Energy 90cm Cooker has a redesigned cooktop. The triple ring wok burner sits to the left of the cooktop, rather than the centre, creating more space to simultaneously prepare rice and other dishes while wok cooking. There are two large burners for stock or pasta pots, a medium burner for sauces and a smaller simmer burner.

The 60mm splashback at the rear of the cooker protects the wall from heat transfer and spills. The one piece cooktop design creates an easy to clean surface, with no gaps or crevices for dirt and grime to build up.

Cooker features

FLAME FAILURE PROTECTION

Thermocouples stop the flow of gas in the event of an accidental flame failure. The thermocouple intervenes within 3 seconds of the flame switching off and it is active even in the event of a power cut.

TRIPLE RING BURNER

This special burner with a triple ring flame provides rapid heat. The power of 14.5 Mj/H ensures maximum efficiency and faster cooking times.

TITANIUM ENAMEL - EASY TO CLEAN

Thanks to the low porosity of titanium enamel cleaning is so much easier and it reduces the build up of cooking residues.

TRIPLE GLASS INSULATED DOOR

The glass window is easily removable to allow the cleaning of the internal glass.

HEAVY DUTY CAST IRON TRIVETS

Glem heavy duty cast iron trivets are designed to securely locate into the cooktop. Hard wearing and safe.

STAINLESS STEEL LEGS

Adjustable to match a bench height from 890 to 930mm.

TANGENTIAL COOLING FAN

The tangential cooling fan: the hot air is expelled reducing the temperature of the external surfaces.

DIGITAL CLOCK AND TIMER

Shows time of day and provides accurate time control.

LONG LIFE DOOR SEAL

Fibreglass sheathed stainless steel mesh door seal that lasts the life of the cooker.

15 AMP PLUG IS REQUIRED

15 AMP plug is fitted for easy connection to a 15 AMP outlet.

Electric oven functions

FAN FORCED

Fast heat up and rapid cooking from a circular element around a fan that pushes the heat through for maximum efficiency.

FAN ASSIST

Superb heat distribution perfect when cooking on more than one shelf. The heat is from a top and bottom element with fan assistance.

CLASSIC BAKE

Traditional oven heating from a top and bottom element without fan assistance. Great for slow cooking.

FAS ASSISTED ELECTRIC GRILL

The grill element operates with fan assistance which is excellent for thicker cuts of meat.

GRILL

Closed door grilling for improved efficiency and cooking smell retention.

OVEN LIGHT

Gas fan oven functions

STATIC GAS

Gas baking without fan assistance for those times when you don't want air movement in the oven.

FAN ASSISTED GAS OVEN

Gas baking with fan assistance. Eliminates cold spots when cooking on more than one shelf. Great even heat distribution.
