Made in Italy. NEW for 2019

Exclusive to Harvey Norman

ENERGY SELECTIVE OVEN TECHNOLOGY

The oven can be heated using either electricity or gas. Select the energy to match your recipe. Roasts are juicier, more succulent. There is less shrinkage when cooking meat in a gas oven.
Pastries can be flakier and crisper when cooked in an electric oven.
Using the Energy Selective Oven you can choose the best energy to use every time you cook. Develop new techiques to be able to produce perfect cooking results.
