

ALPHA  GLEMGAS

Easy-to-use
functionality

High-power burners

The new triple-ring burners are more powerful and distribute the heat below the pan better, to guarantee unique performances in terms of heating time and cooking uniformity. The classic triple-ring burner generates 3,6 Kw of power.

Outstanding design

Glem introduces the new Alpha line, with soft and curved lines and extremely functional in everyday use. A complete range to satisfy any need: dimensions (from 53x50 cm to 90x60 cm), oven size (normal, maxi), cooktop combination (gas burners, electric hotplates, mixed). Some models are also equipped with a LPG bottle compartment or with an additional lateral storage compartment. All cookers are available in stainless steel and in white.

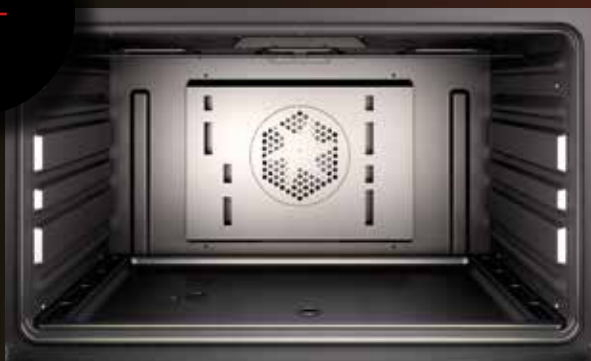

Single mould cooktop

Glem models are focused not only on technological innovation, but also on structural details. The new cooktops, made of one single piece, have a continuous surface with no patchiness and are extremely easy to clean. The new minimalist design meets the current trends that prefer basic and clear-cut shapes.

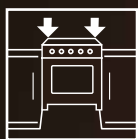

Excellent performances

Not only design and functionality, but also and most of all high level performances. The new ALPHA cookers have specific functions, for both hobs and ovens, that allow to differentiate the type of cooking to satisfy and cooking need.

Titanium enamel easy to clean.

Thanks to the low porosity of the titanium enamel, cleaning is so much easier and reduces dirt build up. The titanium enamel is resistant to the attack of acids and maintains its colour over time even after intensive use. The brightness of the titanium enamel gives more room and widthness to your oven.

Building-in

All Glem Gas appliances come with an European Class 2 certification (according to EEC norm UNI EN 30-1-1 class 2), certifying that they are also approved for installation in contact with kitchen cabinets.

Temperature reduction

33% temperature reduction on operating surface.
