Glem World

PROJECT *and* EMOTION MADE *in* ITALY

Glem brand belongs to Glem Gas group established in 1959 in San Cesario, a few kilometers from Modena, in the heart of Emilia and of this territory it proudly carries on the culinary excellence, the artistic tradition, the passion for the land, the spirit of innovation and the craftsmanship of its people. The technological and aesthetic content of our products represents our absolute value, a rigorous and

emblematic image of Made in Italy. Materials, shapes and technologies of Glem products are developed thanks to our research and development department through the collaboration with designers of international renown. All our products are assembled in our local premises and are submitted to strict quality controls so as to grant excellent performances both technological and aesthetic.

Glem Experience

I COOK *with* GLEM

Glem represents the Italian excellence in realizing cooking appliances at an international level. Our product range, wide and varied, follows and brings forward the market development so as to grant the highest quality worldwide. Made in Italy is for us a synonym of style, design and product quality, attention for the environment and for the people. Passion is the essential in-

gredient for every successful recipes. Glem has changed how to conceive the kitchen through a new aesthetic function of the appliances. It is a creative room where design and functionality allow to express the own taste and style thanks to the versatility of a range, aesthetically refined and simple to use, in position to satisfy any tastes and needs.

A young woman with brown hair tied back, smiling at the camera. She is wearing a black long-sleeved top and a white apron. The apron has the text 'Io Cucino con GLEM' printed on it, with a red crown icon before 'GLEM'. Her right hand is on her hip.

Io Cucino
con
 **GLEM**

Glem Style

GLOBAL *and* SMART CITIZENS

We develop products according to the contemporary living, favouring materials and innovative shapes which grant charming aesthetic, ergonomic shapes, ease of use and maintenance. Our appliances become object of

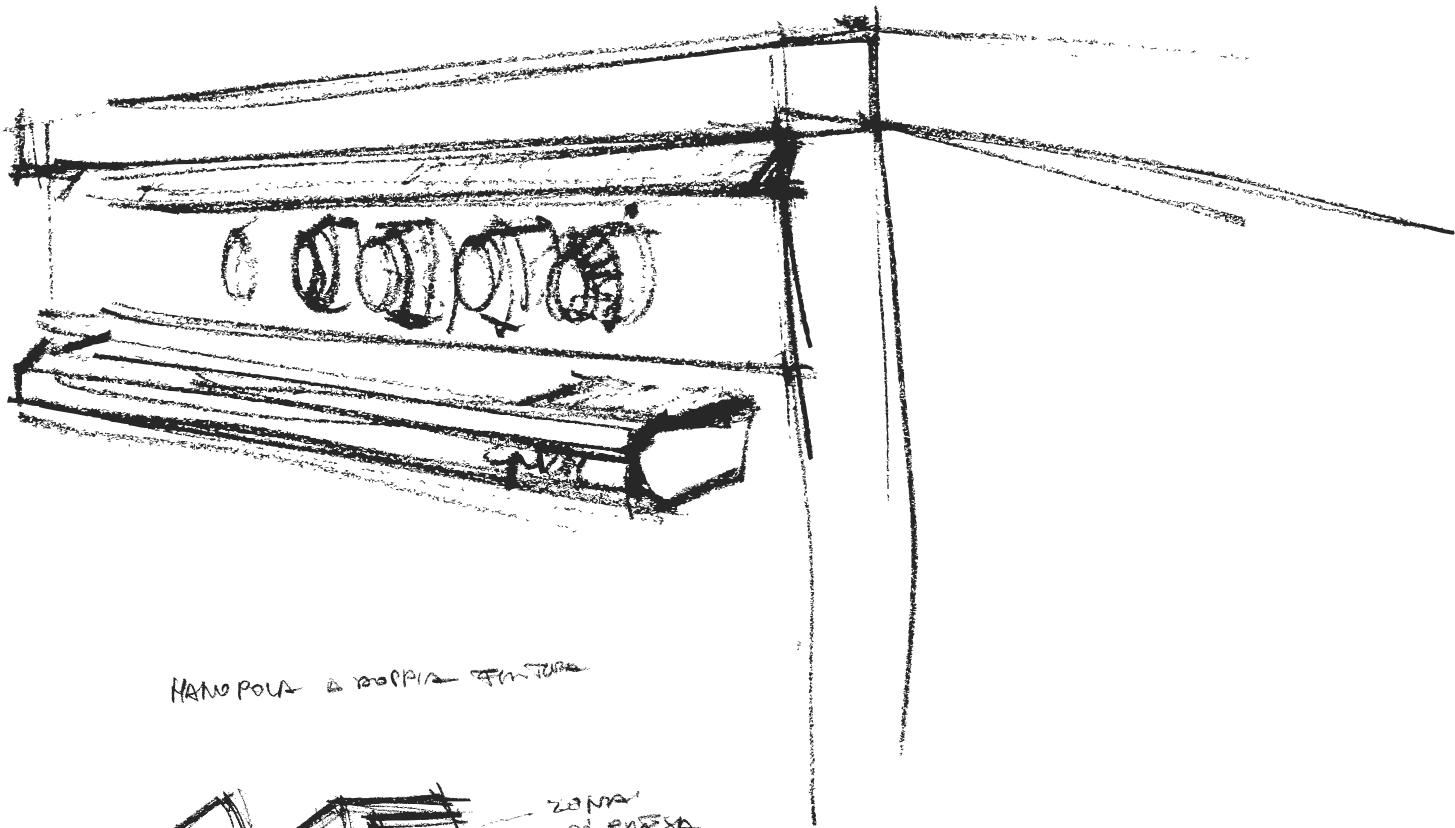

furniture able to perfectly adapt to the last fashion trends and interior design. Pragmatism, experience and creativity are the ingredients which have brought Glem to receive prestigious awards and praises in the design area.

COOKERS

UNIQUE *and* FUNCTIONAL

Innovative and refined. The new Glem cookers are high-tech products designed to meet the most modern trends and needs of contemporary living. The styling and detail create a cooker that is more of a piece of furniture than just an appliance.

Our collaboration with Italian Designer Marcello Cutino, BCF design, created a new interpretation of free standing

cookers. It is a blend between tradition and modernity. This unique approach has been given industry recognition through Glem Gas being awarded one of the most significant international design awards in the industry: The Menzione d'Oro of the XXII Premio Compasso d'Oro ADI (Mention of Honour of the XXII Compasso D'Oro ADI awards).

ADI Design Index is the annual publication of ADI
Associazione per il Disegno Industriale (Industrial Design Association)
that collects the best Italian design put into production.

TITANIUM ENAMEL - EASY TO CLEAN

Thanks to the low porosity of the titanium enamel, cleaning is so much easier and reduces dirt build up. The titanium enamel is resistant to the attack of acids and maintains its colour over time even after intensive use.

MAXI OVEN

The size of the oven cavity has always been a feature of Glem cookers. The capacity (in litres) of our ovens is among the largest in the market. We pay particular attention to the width of the cavity so as to allow the use of the largest baking dishes.

SAFE TOUCH

The Operational surface temperatures are reduced thanks to an innovative induced tangential cooling system which exhausts hot air from the rear of the cook top.

COLD DOOR

The high-end models are supplied with a triple-glass that, together with the tangential-flow cooling fan, guarantees lower temperatures on the oven door.

REMOVABLE INNER GLASS DOOR

Essential design for ease of use. The smooth inner part of the oven door gives not only a clean look it makes cleaning so much easier. The glass window is easily removable to allow the cleaning of the internal glass.

TANGENTIAL COOLING FAN

Thanks to an innovative tangential cooling fan, hot air is expelled from the rear of the cook top keeping the control area and door cooler. This makes it more comfortable for anyone using the cooker and reduces the energy consumption by taking advantage of the natural “chimney effect” created by hot air.

FULL GLASS DOOR

The full glass oven inner door grants strength and solidity and it also facilitates the cleanliness since it is completely smooth.

ENERGY EFFICIENCY CLASS

Environmental friendly, all Glem model with electric ovens are class A or better, a clear indicator of product quality.

MULTIFUNCTION GAS OVEN WITH FAN

Glem has created an innovative oven which combines all the features of a multifunction electric oven with those of a gas oven. The traditional cooking of a gas oven, ideal for roasting and baking, combined with fan forced ventilation provides a great heat distribution for single and multi-level cooking. More recipes prepared in less time and with less energy consumption.

MULTICHEF (FAN SWITCH)

The Multichef button allows you select between fan assisted or static cooking in gas ovens. This provides great versatility in cooking times and methods. Simply press the button marked with the fan on the control panel of your cooker for the fan to create perfect heat distribution inside the oven. The accurate and constant temperature of the oven browns dishes perfectly and allows you to cook more than one dish simultaneously, optimising the use of the space inside the oven.

SAFETY VALVE

Thermocouple stops the flow of gas in the event of an accidental flame failure. The thermocouple intervenes within 3 seconds of the flame switching off and it is active even in the event of a power cut.

TRIPLE RING BURNER

The special burner with triple ring makes the most of the power and the special form of the burner permits uniformity of the flame. The power of 3.3 kW to 3.8 kW ensures maximum efficiency and faster cooking times.

DUAL BURNER WITH DUAL CONTROL

This powerful burner allows you to cook any food in the best possible manner and in the best possible time. The dual control means you can adjust the flame for each individual ring at a power of between 0.8 kW and 4.5 kW. It is therefore possible to turn on the central ring or the dual outer ring, or both: for large and small pans, concentrating the heat and energy only where it is needed.

LEFT TRIPLE RING BURNER

This is a new arrangement of the burners. We have positioned the triple ring burner (3,6 kW) to the left. The overall functionality of the stove top is perfectly optimised. Even when using a 30 cm diameter pan on the left burner, there is enough clearance for other pans to be used on the other burners.

FRYTOP

Frytop metal plate is ideal for frying and bake according to Japanese tradition. The cooking zone of 1.950 W, allows you to prepare or keep food warm both on the middle or on the entire cooking surface. It also has a perfect temperature control as well as an optimal heat distribution for preparing delicate food, low-fat meat, fish and vegetables.

CRYSTAL LID

Glass crystal lid ensures the protection of the kitchen wall rear the stove from stains and dirt produced during cooking. In addition it allows you to preserve the cleanliness of your household appliance.

BUILDING-IN

All Glem cookers are approved to be built into your kitchen cabinetry according to the European Building-in Homologation (UNI EN 30-1-1 class 2). No space required between the bench and the cooker.

MAXI GRILL

Thanks to new burner the grilling area increased to 75%.

DEFROSTING

The fan operates without heat. It provides effective defrosting in half the time.

CAST IRON GRIDS

The new design of the cast iron grids is intended to maximise space and integrate perfectly with the cooker top.

LEADING EDGE DESIGN

The full width handle on the oven door offers a sleek horizontal element to the aesthetic that integrates with modern kitchen design. It follows the most innovative trends in the world of design. There is a refinement in the detail of the control knobs and the cast iron grids. The 4 cm height of the hob is designed to match perfectly with modern bench profiles and materials.

CONTINUOUS SIDES

The new Monolith cooker was designed with continuous sides to underline the solidity of the materials and the strength of this new range cooker.

TOUCH CONTROL

The new electronic touch programmer allows to set easily and quickly the required cooking time.

ONE-HAND IGNITION

The one-hand ignition allows to ignite the cooker through an easy pression of the knob.
