### Glem World

# PROJECT and EMOTION MADE in ITALY

Glem brand belongs to Glem Gas group established in 1959 in San Cesario, a few kilometers from Modena, in the heart of Emilia and of this territory it proudly carries on the culinary excellence, the artistic tradition, the spirit of innovation and the craftsmanship of its people. The technological and aesthetic content of our products represents our absolute value, a rigorous and emblematic image of **Made in Italy**. All products Made in Italy are assembled in our local premises and are submitted to strict quality controls so as to grant excellent performances.

## Glem Experience

## IO CUCINO con GLEM

I cook with Glem

"I cook with Glem" encapsulates our renewed identity, based on an impressive heritage of values for sharing, with the product at the centre of episodes from life and personal stories just waiting to be told. Investigating people's experience of using our products every day places the spotlight on our audience in its dialogue with us through social media interaction.

## Glem Style

## GLOBAL and SMART CITIZENS

We develop products according to the contemporary living, favouring materials and innovative shapes which grant charming aesthetic, ergonomic shapes, ease of use and maintenance. Our appliances become object of furniture able to perfectly adapt to the lastest fashion trends and interior design.

Pragmatism, experience and creativity are the ingredients which have enabled Glem to receive prestigious awards and praises in the design area.

#### **OVENS**

## MODERN LOOK, HIGH PERFORMANCE

#### **PIZZA**

This special Pizza program allows you to cook pizzas at the exact same temperature as you would in a wood oven - evenly and in just a few minutes.

This program is also perfect for baking fresh focaccia and bread.

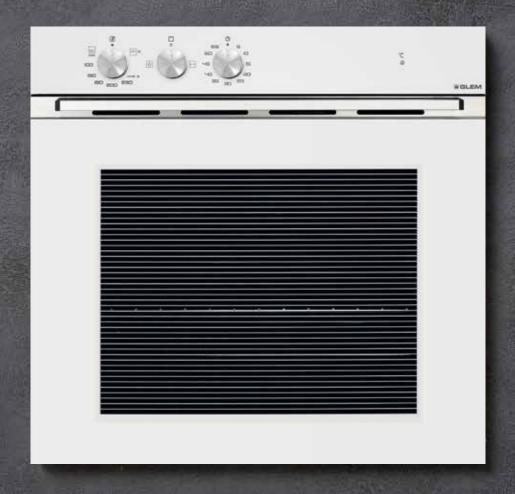

#### **MULTIFUNCTION GAS OVEN WITH FAN**

Glem has created an innovative oven which combines all the features of a multifunction electric oven with those of a gas oven. The traditional cooking of a gas oven, ideal for roasting and baking, combined with fan forced ventilation provides a great heat distribution for single and multi-level cooking. More recipes prepared in less time and with less energy consumption.

#### PRESET TEMPERATURE

Thanks to the electronic control of the temperature, the oven will indicate the ideal preset temperature for each function. This function guarantees a constant temperature inside the cavity with optimal cooking results.

#### TANGENTIAL COOLING FAN

Tangential cooling means the oven remains cooler on the outside, to avoid heating the kitchen furniture or forming condensation. The tangential fan at the top of the oven starts up automatically a few minuters after the oven is turned on, and a thermostat device ansures it continues to run after the oven is turned off until it has cooled down.

#### **OVENS**

## EASY and SAFE COOKING

#### **TITANIUM ENAMEL - EASY TO CLEAN**

Thanks to the low porosity of the titanium enamel, cleaning is so much easier and reduces dirt build up. The titanium enamel is resistant to the attack of acids and maintains its colour over time even after intensive use.

#### **COLD DOOR**

The external temperatures are reduced thanks to the new oven door. The innovative extraction chimney increases considerably the air flow circulation inside the oven so as to have external temperatures very low.

#### **MULTICHEF (FAN SWITCH)**

The Multichef allows you select between fan assisted or static cooking in gas ovens. This provides great versatility in cooking times and methods. Simply select the fan with the dedicated knob on the control panel to create perfect heat distribution inside the oven. The accurate and constant temperature of the oven browns dishes perfectly and allows you to cook more than one dish simultaneously, optimising the use of the space inside the oven.

#### **FULL GLASS DOOR**

The full glass oven inner door grants stength and solidity and it also faciltates the cleanliness since it is completely smooth.

#### **OVEN LIGHT**

It is operated utilizing the oven functions.

#### PIZZA

Ideal for cooking pizza.

#### PRE-HEATING

This time-saver preheats the oven approx. 30% faster by using all the heating elements at once.

#### TRADITIONAL COOKING

The heat is given by the bottom and upper oven elements. Ideal for pastry cooking and traditional recipes.

#### **BOTTOM ELEMENT**

Ideal for cooking pies and to give a final touch to the cooking.

#### **BOTTOM ELEMENT WITH FAN**

The heat of the bottom element is spread through the fan. Ideal for soufflés.

#### **UPPER ELEMENT**

This function allows direct cooking. Very good for cooking au gratin.

#### STATIC + FAN

The heat given by the bottom and upper oven elements is spread through the fan.

#### UPPER ELEMENT + FAN

This function allows direct cooking. Very good for cooking big pieces of meat.

#### GRILL

It is used to cook "au gratin". Ideal for cooking "thin" meat.

#### **GRILL WITH FAN**

The grill along with the fan spreads the heat in a homogenous way. It is ideal for cooking medium and very thick meat.

#### GRILL + TURNSPIT

Ideal for grilling

#### DOUBLE GRILL

The grill along with the upper element allows grilling on wider areas.

28 | built-in glem

#### **DOUBLE GRILL WITH FAN**

Ideal for grilling meat and for cooking fish.

#### MULTIFUNCTION (CIRCULAR + FAN)

The fan moves the hot air inside the oven, allowing homogeneous cooking on 3 levels, without spreading any smell.

#### DEFROSTING

The fan is operated without any element. It assures rapid defrosting in few minutes and in the best possible way.

#### LOW TEMP

The fan together with the preset temperature at  $40~^{\circ}\mathrm{C}$  is ideal to defrost in low temperature or manteinig hot cooked dishes.

#### GAS

Traditional gas cooking.

#### GRILL GAS

Ideal for cooking with turnspit.

#### GRILL GAS WITH FAN

The fan spreads the heat produced by the grill gas in a homogeneous way. It is ideal for baking big pieces of meat.

#### GRILL GAS + TURNSPIT

Ideal for baking meats

#### **GRILL GAS WITH FAN + TURNSPIT**

The grill gas with fan function is combined with turnspit.

#### GAS + TURNSPIT

Ideal for even cooking.

#### GAS WITH FAN

The fan spreads the heat produced by the gas burner in a homogeneous way.

#### GAS WITH FAN + TURNSPIT

The gas with fan function is combined with turnspit.

#### **INDUCTION HOBS**

## INDUCTION HOBS, CONTROLLED POWER

#### **POWER AND CONTROL**

The cooktop itself produces electromagnetic vibrations, which induce the pot or pan to generate its own heat. The results are shorter heat-up times, greater precision and a safer cooking surface.

#### **PROTECTION AGAINST BURNS**

Induction does not heat outside the pot space. The heat generated by the pot during use of the hob is not transmitted to the surface around the cooking area. There is also a warning light that indicates residual heat so you know when the area under the pot has cooled down to a safe temperature ( $< 60^{\circ}$  C).

#### **AUTOMATIC STOP**

It activates automatically if the user forgets to turn off the heating element after cooking. In case there are no power variation within a limited period of time, the heating zone will switch off automatically.

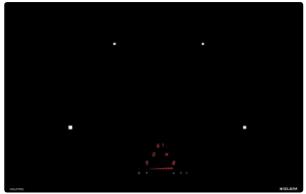

#### **AUTOMATIC TEMPERATURES**

Three preset cooking temperatures, allow automatic preparation of a wide range of dishes.

After selecting the most suitable cooking temperature (40° - 70° - 90°), you have the possibility to move freely without giving particular attention to the cooking, because a temperature sensor controls and maintains stable the cooking temperature. In this way you will optimize energy consumption with a great cooking result.

## **CERAMIC GLASS HOBS**

# The SOPHISTICATED COOKING

#### **CHILDREN SAFETY LOCK**

This device disables the functions of the hob immediately, preventing a child from adjusting or changing the control settings.

#### **OVERFLOW SAFETY DEVICE**

The hob switches off automatically when any water or other liquid overflows.

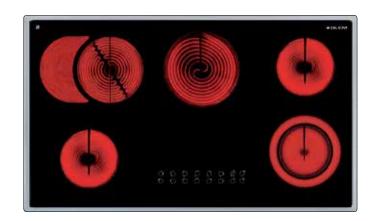

#### **AUTOMATIC STOP**

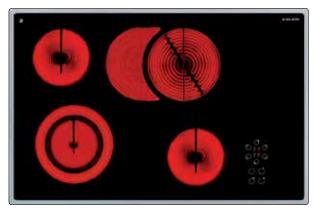

It activates automatically if the user forgets to turn off the heating element after cooking. In case there are no power variation within a limited period of time, the heating zone will switch off automatically.

#### **RESIDUAL HEAT INDICATOR**

All of Glem's glass ceramic hobs have a residual heat indicator. When the hob is turned off, the warning light stays on until the hob has cooled down to below 60 °C, in the interest of added safety.

## **CRYSTAL GAS HOBS**

# PURITY of GLASS

#### TRIPLE RING BURNER

The special burner with triple ring makes the most out of the power. The special shape of the burner permits uniformity of the flame. The power of 3.3 kW to 3.8 kW ensures maximum efficiency and faster cooking times.

#### **ONE-HAND IGNITION**

The one-hand ignition allows to ignite the hob through an easy pression of the knob.

#### **CAST IRON PAN SUPPORT**

Cast Iron is a very heat-resistant material that makes hobs long-lasting and similar to the professional ones, from an aesthetical point of view as well as from a functional one. They have been designed with particular attention to safety so that pans of any dimension can be put on them without falling over.

#### GV955BK

## **GAS HOBS**

# THINK and then COOK

#### **DUAL BURNER WITH DUAL CONTROL**

This powerful burner allows you to cook any food in the best possible manner and in the best possible time. The dual control means you can adjust the flame for each individual ring at a power of between 0.8 kW and 4.5 kW. It is therefore possible to turn on the central ring or the dual outer ring, or both: for large and small pans, concentrating the heat and energy only where it is needed.

#### TRIPLE RING BURNER

The special burner with triple ring makes the most out of the power. The special shape of the burner permits uniformity of the flame. The power of 3.3 kW to 3.8 kW ensures maximum efficiency and faster cooking times.

#### **ONE-HAND IGNITION**

The one-hand ignition allows to ignite the hob through an easy pression of the knob.

#### **CAST IRON PAN SUPPORT**

Cast Iron is a very heat-resistant material that makes hobs long-lasting and similar to the professional ones. They have been designed with particular attention to safety so that pans of any dimension can be placed them without falling over:

## **HOODS**

# POWER and SILENCE

#### PERIMETRAL ASPIRATION

Thanks to the special restriction created, the perimeter extraction system generates an increase in air speed and reduces the quantity of fumes which escape beyond the hood's extraction rim. The stainless steel panels add prestige to the product for a more elegant, sophisticated look. The flat, smooth surface also makes the hood easier to clean.

#### **POWER LEVEL (1 - 2 - 3)**

Glem offers a variety of extractor units so you can select the one best suited to your personal needs.

#### **STYLE AND ELEGANCE**

Kitchens are all the more in harmony with the home, with efficient extractor systems that blend in with the design of the furniture. Glem presents a range of updated models with a suitable image and improved functionality that can fit in with any types of kitchen furniture; they can be installed under cabinets or independently on a wall. Made of stainless steel and glass, with sophisticated details, Glem hoods can add elegance to kitchen environments.

#### **FILTERS**

There are two types of filter that optimize use of the hoods: a grease filter and an active carbon odour filter (provided as standard with Glem hoods). The grease filter comes in two types: metal or synthetic, and protects the motor by preventing grease in the cooking fumes from damaging it. The metal filter can be cleaned in the dishwasher. The odour filter is an active carbon filter that purifies the air before expelling it back into the kitchen environment.

#### **GHB127IX WALL HOOD**

#### $Per formance\ and\ features$
