

INDUCTION

The new induction cooktop from Glem features a boost zone for each cooking zone giving almost instant heat up. Induction is an exciting and rewarding method of cooking. Fast heating, highly efficient and excellent temperature control gives the cook full command over the cooking process.

Induction cooktops use magnetic energy as opposed to conventional infra red heat, to heat the vessel. As the only heat transfer is directly to the bottom of the pan there is significantly less energy wasted.

The 4 Booster zones takes the cooking zone to maximum power in seconds, this speeds up heating and dramatically reduces the cooking time.

FEATURES

- Protective front stainless steel frame - no damage from saucepans
- Slide touch control - easy to use and control
- 4 cooking zones with Boost function - gives maximum performance on every zone
- Automatic pan sensor - zone will not operate without a pan in place
- Residual heat indicators - safety feature
- Child lock - safety feature
- Total maximum power - 7000w

Type of appliance	60cm Induction Hob
Model no.	GLIND64B
Finish	Ceramic glass
Dimensions	590 x 520 x 55
Cooking zones	4
Zone ratings	
Total power (W)	7000
Front left (W)	1200 (1500*)
Rear left (W)	2300 (2600*)
Rear right (W)	1200 (1500*)
Front right (W)	2300 (2600*)
Functions/Safety	
Control mode	Slider touch
Vitroc ceramic glass	Euroka
Power stage setting	9
Timer (min)	99
Pan sensor	●
Auto switch off safety	●
Child lock	●
Residual heat indicator	●
Voltage/frequency	220-240V 50Hz
Bench cut out size	490mm x 560mm

CERAMIC

The stainless steel front frame offers protection to the leading edge of the ceramic hob. The easy to use controls with clearly identified cooking zones makes the Glem ceramic cooktop a pleasure to use.

Varying size zones allow for efficient cooking using different sized pots and pans. There is also an extendable cooking zone that provides even greater flexibility in the type of pan that can be used. Non magnetic saucepans and pots are usable on the Glem GLCER64 ceramic cooktop.

The cooking areas on the cooktop reach maximum temperature in seconds and provide fantastic even heat distribution. There are residual heat warning lights to inform you which heat zones are still warm after cooking, the light switches off automatically once the zone cools.

There is child lock protection for peace of mind and overheat protection should the cooktop be accidentally left on or the incorrect cookware used.

An electronic timer with audible end of cooking cycle creates a cooktop that can be set to operate when you want it to.

Easy to clean with touch controls printed directly onto the glass, just wipe and dry to leave the cooktop looking brand new for years.
