

Glem Unica Series 90cm Stainless Steel Cookers

Italian made and designed

OVEN FUNCTIONS

Electric oven functions

FAN FORCED

Fast heat up and rapid cooking from a circular element around a fan that pushes the heat through for maximum efficiency.

FAN ASSIST

Superb heat distribution perfect when cooking on more than one shelf. The heat is from a top and bottom element with fan assistance.

CLASSIC BAKE

Traditional oven heating from a top and bottom element without fan assistance. Great for slow cooking.

FAN ASSISTED ELECTRIC GRILL

The grill element operates with fan assistance which is excellent for thicker cuts of meat.

GRILL

Closed door grilling for improved efficiency and cooking smell retention.

OVEN LIGHT

15 AMP PLUG IS REQUIRED

15 AMP plug is fitted for easy connection to a 15 AMP outlet.

Gas fan oven functions

STATIC GAS

Gas baking without fan assistance for those times when you don't want air movement in the oven.

FAN ASSISTED GAS OVEN

Gas baking with fan assistance. Eliminates cold spots when cooking on more than one shelf. Great even heat distribution.

STATIC GRILL

Electric grill element. Closed door grilling for improved efficiency and cooking smell retention.

GRILL WITH FAN ASSISTANCE

Electric grill element operates with fan assistance.

OVEN LIGHT

EASY 10 AMP PLUG IN

10 AMP plug fitted for a quick and easy connection to a standard GPO.

Cooker features

FLAME FAILURE PROTECTION

Thermocouples stop the flow of gas in the event of an accidental flame failure. The thermocouple intervenes within 3 seconds of the flame switching off and it is active even in the event of a power out.

TRIPLE RING BURNER

This special burner with a triple ring flame provides rapid heat. The power of 14.5 MJ/H ensures maximum efficiency and faster cooking times.

TITANIUM ENAMEL - EASY TO CLEAN

Thanks to the low porosity of titanium enamel cleaning is so much easier and it reduces the build up of cooking residues.

REMOVABLE FULL GLASS DOOR

The glass window is easily removable to allow the cleaning of the internal glass.

HEAVY DUTY CAST IRON TRIVETS

Glem heavy duty cast iron trivets are designed to securely locate into the cooktop. Hard wearing and safe.

STAINLESS STEEL LEGS

Adjustable to match a bench height from 890 to 930mm.

TANGENTIAL COOLING FAN

The tangential cooling fan: the hot air is expelled reducing the temperature of the external surfaces.

DIGITAL CLOCK AND TIMER

Shows time of day and provides accurate time control.

LONG LIFE DOOR SEAL

Fibreglass sheathed stainless steel mesh door seal that lasts the life of the cooker.

GAS OR DUAL FUEL

GRANDE 132 Litre Family Sized Oven Capacity

Exclusive to Harvey Norman, Domayne and Joyce Mayne

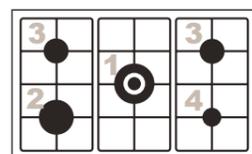

THE GRANDE 132 LITRE OVEN

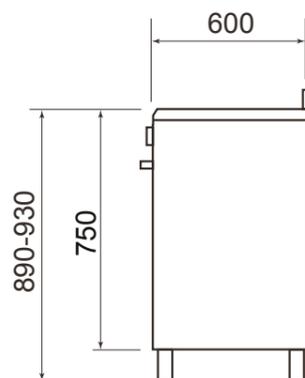

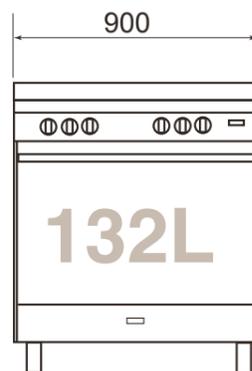

Practically the largest oven capacity on the market with 132 litres of easy to use space for multi batch cooking. There is enough room to cook for the biggest families. The shelves are wide, the oven is deep and even with all this capacity the Unica 90 has room for a storage space under the oven.

The shelves run on chrome plated steel guides for safe, stable sliding. Inside the oven the Titanium grey enamel means easier cleaning without the use of chemicals. We use a pyrolytic style door seal which will last the life of the cooker and the full glass inner door can be easily disassembled for cleaning inside the door.

The Unica Series 90cm cookers are manufactured in the Glem factory located in Modena, Italy. Glem has been building cookers in Modena since 1959 and is regularly recognised as being the number one selling cooker brand in Italy. Glem is a famous cooking brand all over the world and the Unica Series has been developed specifically for the Australian market.

1. Triple ring wok burner
2. Large burner
3. Medium burner x 2
4. Simmer burner

MAKING THE RIGHT CHOICE - GAS OVEN OR ELECTRIC OVEN

GAS OVEN MODEL - UN965MVI

Benefit from the lower running costs of gas. Benefit from the moist cooking environment gas creates which produces succulent tender roasts with less shrinkage and more flavour.

Gas provides a faster heat up time purely because the heat is instantaneous. In a blackout the gas oven can still be used by lighting it manually.

Multifunction gas oven with fan assist feature

The gas burner is under the door of the oven. Heat is evenly distributed by the fan located at the rear of the oven which creates a constant temperature throughout the entire oven.

Foods can be placed anywhere in the oven without fear of heat variation. It maximises the benefit of the large oven capacity allowing for all shelves to be used simultaneously.

ELECTRIC OVEN MODEL - UN965EI

The dual fuel Unica 90 combines the 5 burner gas cooktop with a multifunction electric oven. Very easy to use and the ability to change the oven function provides choice in the style of cooking you want to create.

The drier heat of electricity really crisps up pastries and creates perfect crunchy oven fries.

Multifunction electric oven

The Glem multifunction has electric elements in the roof of the oven, under the floor and at the rear of the oven.

The elements operate individually or together with fan assistance to offer a range of cooking options. The fan distributes the heat evenly throughout the oven cavity.

MAKING THE CONNECTION

Connecting the gas

Glem cookers are certified for flexible hose gas connection making the task easy for your installer. The cookers are set for Natural Gas connection with a full installation kit included.

An LPG conversion kit is included with every cooker.

Connecting the electricity

UN965MVI Gas cooker - a simple 10 amp plug in connection. Just like a toaster.

UN965EI Dual fuel cooker - has a 15 amp plug and requires a 15 amp circuit.
