COOKING APPLIANCES

Specialisti in cottura

Cooking specialists

Glem Gas S.p.A. was founded in 1959 at San Cesario, a few kilometres from the city of Modena, in the heart of Italy's Emilia-Romagna region.

Culinary excellence, artistic tradition, and a love of the land are the values Glem Gas carries into everything it does today. The company manufactures kitchen appliances with a spirit of innovation and master craftsmanship for which the people in this part of Italy have become renowned.

To mark its long history of more than 60 years manufacturing in Italy, Glem Gas proudly embraces its identity as a company that is passionate about making appliances for the pleasure of cooking. Made in Italy for kitchens all over the world, each product has the proud stamp of Italian style and engineering know-how.

Convenience, design, quality and respect for people and the environment are the keywords that express the Glem Gas approach. "Specialisti in cottura" (Cooking Specialists) continues to be the driving principle underpinning the creation of these high-performance, multi-purpose, and reliable appliances. Built with quality to last over time, each product must also be user-friendly and surpass a cook's expectations. Just like the many brands which stem from the Emilia-Romagna region, Glem Gas fuses best in class features with a design flair firmly anchored in Northern Italy.

La buona cucina italiana

The ingredients used in cooking form part of the language of our daily lives.

"I cook with Glem Gas." This phrase encapsulates a philosophy and loyalty to be celebrated. It shows an appreciation for cooking performance and gastronomic delight in equal parts. There is a pride in knowing these appliances are not merely a device for optimal cooking, but rather an essential ingredient in expressing Italian style, invention and imagination. Glem Gas makes the pleasure of savouring "la buona cucina italiana" (the good Italian cuisine) truly unique, with products tailored to suit Australian kitchens.

Good cuisine is a matter not only of passion, quality, knowledge and hard work; it is an evolution of our identity, our influences and our food experiences. A childhood memory, the taste of an exhilarating dish at a restaurant, or the discovery of new flavours when travelling can all help to shape our own cooking palate. By cooking together, or cooking for others, we feel a sense of satisfaction and belonging. We create experiences that can be shared and remembered. The best appliances are both a pleasure to use and become a part of our daily lives.

90cm XXL oven Extra Wide

At 140 litres, the ultra wide and deep oven cavity is a leader in its class. Ideal for entertaining and large families. The oven can accommodate all your large dishes simultaneously on multiple levels.

Sealed cavity

The oven's internal cavity is seamless and manufactured as a single component. This ensures easy cleaning and a more uniform temperature with a boost to energy efficiency.

Full glass oven inner door

The one piece inner glass door makes cleaning a breeze.

Smooth closing oven door

The new hinge system ensures smooth opening and closure of the oven door, with very little effort and less noise, for a more pleasant kitchen environment.

A range with amazing sizes and capabilities.

Stainless steel legs

The cookers have a reinforced base with adjustable stainless steel legs equipped with a new easy locking system, for greater stability and durability.

**Outstanding,
ergonomic,
functional design.**

Functional design

Ergonomics are improved by the use of knobs with good grip and a full width oven door handle.

Digital timer

An accurate digital control timer and clock shows time of day and can be set as a reminder for cooking time. There is an adjustable tone and clock display format.

HP•C burner

(High Power Compact)
This high power compact triple ring burner cleverly delivers a uniformly even flame coupled with an energy efficiency gain of 12%.

One-hand ignition

Thanks to the one-hand ignition, the burner flame is easily lit by pressing the knob lightly with just one hand.

Safe touch

The upgraded cooling system reduces surface temperatures and improves energy efficiency while cooking.

Specialista line

The new line of Glem Gas cookers is designed to deliver professional performance and guarantee a superior level culinary experience. The range features a selection of oven energies, a choice between stainless steel and gloss black, and various cooker sizes.

A professional styled cooker with exclusive cutting edge features that ensure an outstanding cooking experience. Performance, practicality and reliability with a choice of oven energies. Air fryer feature standard.

GA

Discretion and refinement for a cooker with an ergonomic design. Huge oven capacities for preparing family meals and the option of 80 cm wide models.

Air fryer feature standard on 90cm model cookers.

A range of cookers to suit the needs of cooks with less space in the kitchen. Compact cooker widths 53 cm, 60 cm and 70 cm.

Air fryer is an optional extra on all GB cooker models.

Innovative ovens.

Glem Gas cookers provide a number of options on the type of oven energy that best suits your needs. The new "Doppio" oven is used in Bi Energy cookers and allows the user to bake and roast using the energy of their choosing. Gas is a moist heat capable of producing superior tasting roasts and electricity is a dry heat that can produce crispy pastries.

Gas ovens are brilliant in an off grid home whereas the flexibility of multifunction electric caters for all cooking tasks.

"Doppio"- Italian for Double - roast using moist gas heat, bake using dry electric heat.

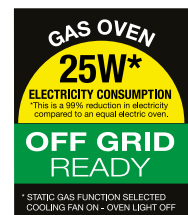

Double the energy sources - double the cooking options - double the fun.

A Glem Gas Australia innovation. We took a conventional oven and combined both gas and electricity in the one oven.

Beautiful succulent roasts using the moist heat of gas and crisp fresh baking using the dry heat of electricity. You get to make the choice every time you cook - fan assisted gas or fan forced electricity. Either way it is fantastic.

Fan assisted gas

Forget everything you have heard about gas ovens. The new Glem Gas 90cm ovens have a sealed cavity, enhanced insulation and a new super efficient oven burner. Professional chefs use gas. They love its speed, its control and its reliability but most of all they love how it cooks. The energy costs less and by using a gas oven Australian homes can save hundreds of dollars in energy costs every year. The electrical connection is a simple 10 amp plug in and for off grid homes it is a great option. Suffering an electrical blackout? The Glem Gas oven can operate without the electricity connected.

Multifunction and fan forced

Cooking in an electric oven whether it be fan forced or multifunction is easy. There are a number of options in the Glem Gas range. Fan forced cooking is fast and efficient. The heat up is rapid, even in the largest cavities. Electric ovens provide steady heat for even cooking and a dry environment that helps turn the tops of Saturday morning muffins a lovely golden brown.

Innovative accessories.

Stainless steel Air Fryer AFB1

The Glem Gas air fryer basket fits into 53, 60, 70 and 90cm Glem Gas cookers.

It uses the movement of hot air in the fan forced function to cook from all sides at the same time. Amazing cooking performance for all frozen foods and a new way of cooking vegetables, meats and pastries.

Breakfast Plate EGPL1

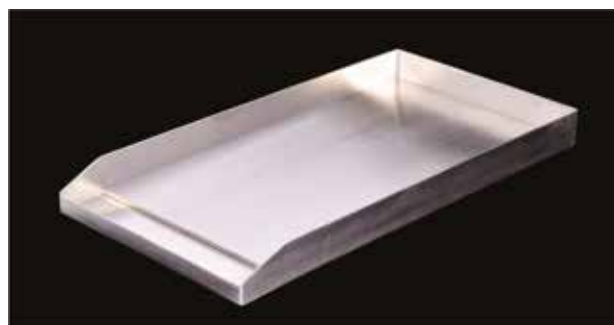

This cast iron griddle plate was designed in Australia with special egg zones to create perfect restaurant quality breakfasts. We have solved the problem of eggs and bacon cooking together in the one pan. Fits all model cookers from 60cm and up.

Teppanyaki Plate GLEMTEP1

Solid 304 Top Grade stainless steel.

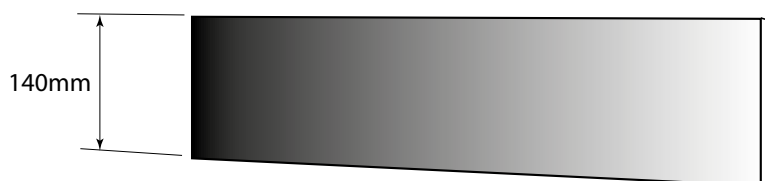

Originally designed for 'Hibachi' style cooking, the teppanyaki plate can be used for everything from prawns to pancakes with a minimum of oil. Best on 90cm & 80cm models.

Cooker Kick plates

Snap easily over the legs of the cooker. Finished in stainless steel or gloss black. Available for all models.

Go to www.glemgas.com.au for details and model numbers.

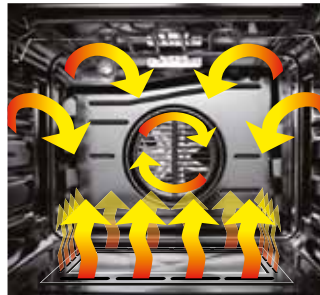

60cm Italian Built in Gas Oven GF64GEI

Fan Assisted for perfect heat distribution - over 60 Years of product development.

It is not surprising that so many professional chefs use gas ovens to create food that tastes better and stays fresher for longer. The moist heat of gas results in moister roasts with less shrinkage and more flavour. Running costs of a gas oven are typically half that of an electric oven.

Installation is easy - even with the electric grill the oven is a simple 10 amp plug in connection. The oven slots straight into a standard cavity, just add clearance under the oven for airflow to the burner. The Glem Gas GF64GEI is ideal for people living on solar - electricity consumption is 1 per cent of an equivalent electric oven. Able to operate without any electrical connection - this oven is perfect for off grid operation or during an electrical blackout. An LPG conversion kit is included with every oven.

4D Heating ensures perfect heat distribution. The oven burner is located under the floor and heat is applied from 4 directions. The fan function allows for multi batch cooking on more than one shelf.

- Big 69 litre capacity
- Easy clean titanium oven liner.
- Triple glass insulated door.
- Automatic cooling fan.
- Digital clock/timer

Italian Stainless Steel Gas Cooktops

Product Highlights

Air Fryer feature

A new way of healthier cooking. The fan in the oven circulates heated air around the food to cook evenly and quickly. Standard feature on 90cm GS and GA cookers. Optional extra on 70, 60 and 53 cm cookers. Also fits GF64GEI ovens.

HP•C burner

(High Power Compact)

The special triple ring burner with a sophisticated compact shape and high power makes full use of its uniform flame to deliver energy efficiency savings of 12%.

XXL 90cm Extra wide oven cavity

A huge opening with a gross internal capacity of 140 litres, for baking large pans and cookware, and cooking all your dishes simultaneously on multiple levels.

Sealed cavity

The oven cavity is seamless and is designed in a single piece, to ensure a uniform internal temperature and more stylish appearance with easier cleaning and improvement in energy efficiency.

Smooth closing oven door

The new hinge system ensures smoother opening and closing of the oven door, with less effort and noise.

Reinforced base with larger legs

Cookers have a reinforced base with large adjustable stainless steel legs equipped with a new quick-fixing system, for greater stability and durability.

Full glass inner door

The inner liner of the oven door is full glass for easier cleaning, a better seal and great visibility to watch the cooking process.

Safety valves

All burners are fitted with a thermocouple to cut the gas flow if the flame is accidentally extinguished. The thermocouple is tripped 3 seconds after the flame goes out. It is still active even in the event of a power blackout.

Tangential cooling fan

The hot air is expelled reducing the temperature of the external surfaces.

Doppio oven

Something special in an oven, exclusive to Glem Gas and developed in Australia. The oven can be operated using gas or electricity. All the advantages of moist gas heat roasting and the dry heat of fan forced electric baking.

Safe touch

The upgraded cooling system ensures a safe and energy efficient operation during cooking.

Oven cooking modes

Oven light

Lights the inside of the oven.

Gas

Conventional gas cooking.

Gas + fan

The fan spreads the heat produced by the gas burner in a homogeneous way.

Conventional cooking

The heat is produced by the elements in the top and bottom of the oven. Excellent for pastries and traditional recipes.

Upper element

This function allows direct cooking. Very good for cooking au gratin.

Bottom element

Ideal for cooking pies and to give a final touch to the baking.

Bottom element with fan

The heat of the bottom element is distributed by the fan.

Grill

Used for gratin dishes. Able to turn the surface of foods golden brown without drying the inside. Ideal for grilling thin pieces of meat.

Double grill

Used for gratin dishes on larger surfaces than Grill, it also provides higher power, to turn foods golden brown more quickly.

Fan double grill

The grill and fan together distribute the heat evenly, roasting foods evenly while turning the surface golden brown. Ideal for mixed grills. Especially suitable for large pieces of foods such as poultry, game, etc.

Fan

The fan circulates the hot air to allow uniform cooking on multiple shelf levels.

Fan Forced cooking

The fan circulates the hot air produced by the circular element inside the oven to allow uniform cooking on multiple levels, with no cross-contamination of odours.

Fan defrosting

The fan is operated without a heating element. It ensures optimal defrosting.

Glem Gas has a range of kitchen appliances to complement the cooking appliance range.

Rangehoods

Select from the family of almost silent Glem Quiet Air series rangehoods for houses with a ceiling cavity over the kitchen, or the powerful 800 Series rangehoods featuring on board motor rangehoods that are ideal for apartments.

Dishwasher

Available in stainless steel or black stainless steel Glem Gas dishwashers are designed to offer value and style with the backing of the Glem Gas brand.
